HTML   CSS   C Programming   JAVA   SQL
Bootstrap   JavaScript   Typescript
React JS   Spring Boot   Hibernate

PROJECTS

Calculator :

The calculator project using HTML, CSS, and JavaScript involves creating a web-based calculator interface that allows users to perform basic arithmetic operations such as addition, subtraction, multiplication, and division.

QR-Generator:

The QR Generator project is a web-based application designed to create Quick Response (QR) codes for any given input text, URL, or data. Using HTML, the project sets up a user-friendly interface where users can input the data they wish to encode into a QR code.
